

Barista Character:

Users will now have a personalized barista character they get to play. This character does not have any animations. The character is only for cosmetic decoration. The barista character will start off as a basic female character without any decorations (besides basic clothing). The character can be a basic character from the character pack already purchased. Each of the cosmetics will be hidden items that unlock once purchased from virtual currency. There are a total of 10 different cosmetic items that can be unlocked:

1. Nose Ring
2. Hair Change
3. Beanie Hat
4. Glasses
5. Shoulder Tattoo
6. New Shirt
7. Ear Rings
8. Hair Color Change
9. Eyebrow Ring
10. Another Tattoo

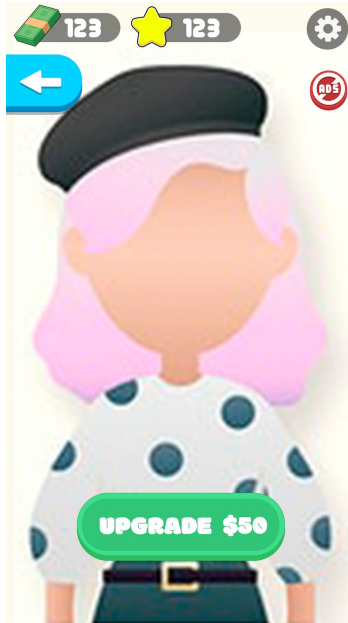

When a user unlocks each item, there is a heart VFX to show the character loves the new cosmetic change.

Users can unlock different cosmetic items for their character by spending cash currency that they collect. After each purchase of an item, the price of the next item will increase by 50%.

1. Unlock 1 = \$50
2. Unlock 2 = \$75
3. Unlock 3 = \$112
4. Unlock 4 = \$168
5.

Each upgrade that the user unlocks to the character will also affect the tips that the user gets. After each unlock, the tips each customer gives will increase by \$0.50.

Note: The barista is still located behind the camera perspective on the main menu. There will be a new barista button on the top left, under the coffee cup page, that will be added. This button will make the camera rotate 180 degrees to show the barista character with an unlock button. See example of page below:

Plane Ticket:

The plane ticket is a UI item that replaces the map icon. This will be used to symbolize the unlocking of a new location. When the user fills the travel location progress bar by collecting enough cash, they will see the plane ticket unlock page. After the page opens, they will hear a plane SFX and the name of their new destination will type out on the ticket UI item.
